## TIPS TO AVOID ENERGY SCAMS

One of the best ways to protect yourself from online scams is by using strong passwords. While many people focus on complexity—adding symbols, numbers and capital letters—password length is equally important. A longer password or passphrase is generally harder for cybercriminals to crack than a short, complex one. Consider creating a memorable phrase made up of several unrelated words, and avoid using personal information like birthdays or pet names. Use a unique password for each account and enable multi-factor authentication when possible. Taking these simple steps can help keep your personal information and online accounts secure.
